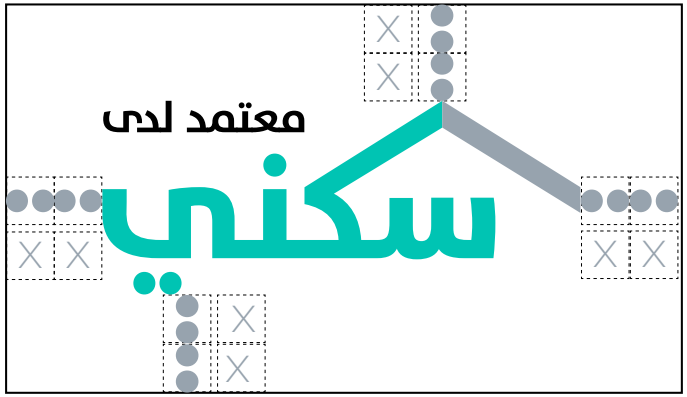
Clear Area & Minimum Size



An important part of maintaining a consistent presentation of Sakani logo is keeping a clear area around it from other text, graphics or Images. Crowding the Logo detracts from its legibility and impact.

The preferred amount of clear area surrounding Sakani Logo is equal to 1/1 from the square created around the double dots under the ي letter.

Sakani Logo should stand alone. Use of frames or boxes is not encouraged. However, in instances when a frame is necessary, it should be placed outside the minimum allowable clear area.

Colored Logo Minimum Size
W: 2 cm, H: 0.86 cm

Black Logo Minimum Size
W: 1.5 cm, H: 0.65 cm

We also need to ensure our logo is easy to read at all times. When reproducing our logo, consider its size and legibility.

A logo that is too small ceases to serve any communicative function. The minimum width use of the primary logo is 2 cm. and 1.5 cm for the black version
